

SourceForts skin chooser

From the SourceForts site:"After many long hours and dodging requests for download updates I've decided to just unload a MEGA skin pack for SF.

It includes all of my old skins as well as some community favorites. But the best part is that it includes what was previously unreleased content! I originally made the map themed skins for V2, but we've made some changes and these won't be used anymore. So they're yours now!"

Visit the SourceForts site for your download.
